ABOUT US

PAKFOR AMBALAJ has been an important supplier of packaging solutions for many major brands in Turkey and abroad with its high quality standards, innovative approach and advanced technology investments in packaging art since its establishment.

It manages the production process in the most efficient way with its experience and professional human resources for the correct determination and solution of the needs of its customers. It expands its product range and market share with its corporate policy, which follows and implements sectoral developments, and corporate values based on transparency, trust and sustainability.

It has adopted the principle of gaining customer satisfaction by offering the best quality service under the most economical conditions. With its expert staff, it responds to the packaging demands of companies where they can display their products.

It proudly presents products produced by using new technologies in the process accumulation it has created, to domestic and foreign markets.

It adds value to its customers by creating a difference in the sector in line with its business approach focused on continuous self-improvement and the philosophy of establishing long-term, mutual trust-based relationships with its business partners.

With the strength gained from your close attention, it aims to provide the best service to you today and in the future.

HISTORY

PAKFOR AMBALAJ SAN.TİC.LTD.ŞTİ. It was established in 2016 with the aim of managing the production process in the most efficient way with its experience and professional human resources for the correct determination and solution of the needs of its customers in the plastic injection sector.

Customer satisfaction has been achieved by meeting IML and sticker label demands in line with the philosophy of establishing long-term, mutual trust-based relationships with business partners and a business understanding focused on continuous self-improvement.

It has started to proudly present the products produced by using new technologies with the process accumulation it has created to the foreign markets as well as the domestic market.

With its expert staff, it has entered the thermoform sector as well as the plastic injection sector to respond to the packaging demands of the companies where they can display their products.

In line with the strength gained from the close attention shown, logistic support programs have been created to share the burden on customers.

It has become an important supplier of packaging solutions of many major brands by increasing its production capacity in the field of export, especially in the field of export, with its high quality standard, innovative approach and advanced technology investments in the packaging art since its establishment by increasing customer satisfaction in the developing world.
